

We recognise that the growing climate emergency is a serious risk to the success of our operations and to the future wellbeing of our staff, our stakeholders and the wider community. We are determined to take positive action.

We sign the Cambridge Climate Change Charter to demonstrate our commitment to tackling the causes of climate change.

We the undersigned will in the next 12 months:

1. Measure and report our emissions. We have estimated or will estimate carbon emissions from our activities using a carbon footprint tool.
2. Start to decarbonise our operations. We will engage our staff and stakeholders in developing a plan to reduce the carbon footprint of our operations and we will take action to implement it.
3. Demonstrate climate leadership. We will seek to use our influence, skills and resources to help others to understand and reduce their carbon emissions too.

Our selected actions:

Measure and report our emissions:

- ✓ Undertake an environmental audit
